Renault Group — Recruitment Team

Lardy

Re: Application for Data Analyst (H/F) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Data Analyst (H/F) apprenticeship at Renault Group in Lardy, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in analysis at a company I can stay with long-term.

Renault Group's transformation over the past few years — the shift toward Ampere as a dedicated software-and-electric vehicle entity, the repositioning of Dacia and Alpine, the broader "Renaulution" strategy — is precisely the kind of large-scale strategic pivot I want to support from the inside rather than analyze from a distance. The Group's Technocentre in Guyancourt and headquarters in Boulogne-Billancourt bring together the engineering depth and commercial ambition that a mechanical engineer turned business consultant like myself is built to bridge.

Analysis has run through my whole career so far. As a Senior Analyst at GEP Worldwide, I turned raw data into decisions clients acted on, including the market research behind a 6% procurement saving. At FORVIA, I analyze competitors' technical and financial positioning for teams across Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal, so my analysis has to hold up under scrutiny from very different specialists at once. My mechanical engineering degree, with coursework in Operations Research and Quality Planning and Analysis, gave me the quantitative foundation for that, and PowerBI is part of my regular toolkit.

I'm currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree has given me a strong technical grounding, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
