Segula Technologies — Recruitment Team
France (site unconfirmed, Segula HQ is Nanterre)

Re: Application for Alternance – Assistant(e) de direction bilingue (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance – Assistant(e) de direction bilingue apprenticeship at Segula Technologies in France (site unconfirmed, Segula HQ is Nanterre), starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in this function at a company I can stay with long-term.

Segula Technologies' project-based model — deploying engineering and business expertise across automotive, aerospace, energy, and rail clients rather than a single product line — appeals to me because it mirrors the breadth I already value from my time at GEP Worldwide, where I worked across client engagements rather than inside a single organization. A 24-month apprenticeship here would let me combine that consulting instinct with hands-on exposure to how a multi-sector engineering group actually operates.

I hold a mechanical engineering degree from NIT Calicut with coursework spanning Operations Research, Project Management, Supply Chain Management, and Quality Planning and Analysis, and I currently work inside FORVIA's strategy function, collaborating weekly with Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal teams. That habit of working across functions, combined with the engineering foundation and the analytical training from my ESSEC MiM, is what I'd bring to this role — the ability to learn a function's specifics quickly and connect them to the bigger picture.

I'm currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree has given me a strong technical grounding, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
